

HyperActive Technologies Expands Presence at FS/TEC 2006

PITTSBURGH, PA — November 3, 2006 – HyperActive Technologies, Inc. has expanded its presence at FS/TEC 2006, becoming an Affiliate Sponsor this year, having been recognized as “The Best First-Time Exhibitor” at the show a year ago.

“This sponsorship has provided us with additional opportunity to reach our key audience,” said Joseph Porfeli, C.E.O. of HyperActive Technologies.

“HyperActive Bob eliminates the guesswork that restaurants face today in predicting demand,” continues Porfeli. “With HyperActive Bob, cooking operations run smoother and cooking rules and procedures are consistently applied. Our customers benefit from dramatically improved quality while also causing a positive impact on speed-of-service and employee training costs.”

FS/TEC

Now in its 11th year, FS/TEC (the International Foodservice Technology Exposition) is the only show that is dedicated totally to technology applications in foodservice. FS/TEC is managed and produced by Nation's Restaurant News with Robert N. Grimes of Accuvia.

HyperActive Technologies

HyperActive Technologies is a visionary at applying intelligent vision and predictive technologies to the needs of the quick-service and fast-casual restaurant industries, with products that promise and deliver transformational results.
